

Plantopia Easy Fill Hanging Baskets

How Plantopia Easy Fill Baskets Started

Chris Haley was a nurseryman for more years than he cares to remember...

He was renowned for the quality of his hanging and wall baskets but found that making so many up was tedious and time consuming.

Spagnum moss was hard to come by and in decline. It was often taken by birds in search of nesting material and damaged

roots and heads when planting the sides of the hanging basket.

That's when Chris had his eureka moment. Why not have a basket that needs no moss, no liners and has a ready made hole in the side that can be popped out to allow the plant through the side without damaging it. Think of the size of

baskets that could be produced...

The idea was the easy part. Now he had to find a way to bring it to fruition.

Windows and Hanging Baskets

After some serious investment, Chris managed to manufacture and produce his easy fill hanging baskets. A local injection mold factory in York

made the baskets with plastics from recycled beer crates. Not only were these baskets easy to fill they were better for the fragile eco sys-

tem, benefitting gardeners and the planet.
